

**Amendments to the Claims**

This listing of claims will replace all prior version, and listings, of claims in the application:

**Listing of Claims:**

1-33. (Canceled)

34. (Currently amended) A transceiver adapter comprising:

a substrate, including first electrical contacts ~~thereon~~ on a first surface thereof for electrically contacting a transceiver; and

second electrical contacts on a second surface thereof along at least one edge of said substrate for electrically contacting a printed wire assembly, wherein said first surface and said second surface are on opposite sides of said substrate and wherein said second electrical contacts comprise two sets of parallel contacts that extend inwardly and perpendicularly from respective edges of said second surface.

35. (Previously presented) The transceiver adapter of Claim 34, wherein said second electrical contacts are finger-shaped.

36. (Canceled)

37. (Previously presented) The transceiver adapter of Claim 34, wherein said second electrical contacts are arranged in a linear array.

38. (Previously presented) The transceiver adapter of Claim 34, wherein said second electrical contacts are along at least two edges of said substrate.

39. (Currently amended) A transceiver adapter comprising:

a substrate, including first electrical contacts ~~thereon~~ on a first surface thereof for electrically contacting a transceiver; and

second electrical contacts along at least one edge of said substrate for electrically contacting a printed wire assembly, wherein said first electrical contacts are a ball grid array, wherein said first surface and said second surface are on opposite sides of said substrate, and wherein said second electrical contacts comprise two sets of parallel contacts that extend inwardly and perpendicularly from respective edges of said second surface.

40. (Previously presented) The transceiver adapter of Claim 39, wherein said second electrical contacts are finger-shaped.

41. (Canceled)

42. (Previously presented) The transceiver adapter of Claim 39, wherein said second electrical contacts are arranged in a linear array.

43. (Previously presented) The transceiver adapter of Claim 39, wherein said second electrical contacts are along at least two edges of said substrate.
